![Drive Connect]

Automate your team's workflows across Salesforce & Google Drive

Increase productivity with Google Drive file management and document generation from an easy-to-use AppExchange app.

Scale your team

You've invested in Salesforce and Google Drive to improve your team's productivity but now their valuable time is spent navigating between the two systems. What if users could access Drive without leaving Salesforce? What if Drive folders were automatically created when Salesforce records were? What if users could generate quotes from Salesforce data and save them directly to Drive? It's all possible now with Drive Connect.

Drive Connect's file management capabilities establish and automate a consistent Google Drive folder structure and link it back to your Salesforce records. Your team will always be able to upload files to the right customer Drive folder from any Salesforce record.

Drive Connect's document generation feature save you from manually coping and pasting data between Salesforce records and Google Docs thus avoiding costly errors. Generate quotes, proposals and invoices into Google Docs, MS Word or PDF formats with a single click.

Drive Connect is one of the easiest AppExchange apps to implement. Most customers have are up and running in minutes. Sign up for our free 14 day trial at driveconnect.me and start scaling your team today.

"Drive Connect makes connecting Google Drive and Salesforce easy!"

Even Peele,
Enterprise Application Architect
